

WORK EXPERIENCE

Frontend Engineer

HealthPlix Technologies

Bengaluru

July'22 - Present

- Architected two flagship capabilities — **AI Clinical Documentation** and **IPD/OPD Billing** — as standalone, end-to-end modules on a **Backend-for-Frontend (BFF)** layer, exposing versioned, contract-driven endpoints so external Hospital Integration Systems can embed each module independently without adopting the full HealthPlix EMR.
- Delivered the **AI Summarization and Dictation** module by integrating OpenAI workflows over **Server-Sent Events (SSE)**, with live parsing and conversational input for real-time clinical note generation.
- Optimized revenue retention by identifying and resolving **95% of revenue leakage cases** tied to ad-performance issues, and stabilized high-stakes **billing systems** by fixing regressions in deposit calculations and payment-split logic.
- Advanced frontend observability with **Sentry** proactive monitoring and **Amplitude** telemetry, cutting bug-resolution time and driving data-informed product iterations.
- Accelerated performance and maintainability by reducing **VisitPad re-renders by 25%**, eliminating memory leaks, and unifying core components (e.g. the Patient Popup) across modules to retire technical debt.
- Built and maintained an in-house reusable UI library with **Shadcn UI** and **Tailwind CSS**, improving frontend consistency and cross-team developer velocity.
- Enhanced **VisitPad in OPD**, contributing to over **2 Crore in clinic sales**, and integrated **WatermelonDB** for offline-first performance in low-network, rural environments.

Data Science Intern

Aramex India Pvt Ltd

Mumbai

Aug'21 - Jan'22

- Improved last-mile delivery performance in Bahrain by refining address extraction, preprocessing, and feature engineering for delivery-point mapping.
- Developed a block and road-number mapping model that increased address precision from **90% to 99%**, leading to a full-time role offer.

SELECTED PROJECTS

Portfolio Website

2026

- Self-built React + TypeScript portfolio with 3D hero (React Three Fiber), an AI chat assistant, and an automated CI pipeline that syncs this resume PDF on every update.

Multiplayer Game Hub

2026

- Real-time multiplayer platform with WebSocket-driven game rooms and bi-directional state synchronization, exploring server-side room logic end-to-end.

Exploding Production Game

2026

Co-developed

- Co-developed a browser game deployed on Render with polished gameplay flow, production routing, and frontend-first interaction design.

Snapgram - Live Demo | GitHub

2024

- Full-stack social app (React, Tailwind, Appwrite) with authentication, posts, likes, comments, and real-time feed updates.

SKILLS

Frontend: ReactJS, TypeScript, JavaScript, Zustand, Shadcn, Tailwind CSS, CSS Transforms
APIs and Realtime: REST APIs, Server-Sent Events (SSE), OpenAI APIs, Firebase, real-time UI workflows
AI Tooling: Claude, AI-assisted development, LLM/chatbot integration, prompt engineering
Engineering Tools: Git, Sentry, Amplitude, Watermelon DB, Render, Netlify
Programming Languages: Python, C++, Java

EDUCATIONAL QUALIFICATIONS

B.E, Electronics and Instrumentation Engineering

Birla Institute of Technology and Science, Pilani

7.47/10.0

2022

Class 12th - ISC Board

City Montessori School, Lucknow

90.33%

2018

Class 10th - ICSE Board

Seth M.R. Jaipuria School, Lucknow

95%
