WORK EXPERIENCE

Software Engineer

HealthPlix Technologies

Bengaluru

July'22 - Present

- Architected two flagship capabilities — **AI Clinical Documentation** and **IPD/OPD Billing** — as standalone, end-to-end modules on a **Backend-for-Frontend (BFF)** layer with versioned, contract-driven endpoints, letting external Hospital Integration Systems embed each module without adopting the full HealthPlix EMR.
- Delivered the **AI Summarization and Dictation** module by integrating OpenAI workflows over **Server-Sent Events (SSE)**, with live parsing and conversational input for clinical note generation.
- Optimized revenue retention by identifying and resolving **95% of revenue leakage cases** tied to ad-performance issues, and stabilized high-stakes **billing systems** by fixing regressions in deposit calculations and payment-split logic.
- Hardened release quality with **unit and integration tests (Jest, React Testing Library)** and **end-to-end** coverage of critical billing and VisitPad journeys, backed by **Sentry** monitoring and **Amplitude** telemetry that cut bug-resolution time.
- Mentored interns and junior developers** through onboarding, code reviews, and design walkthroughs, while driving **end-to-end frontend ownership** and architecture decisions for critical healthcare products.
- Accelerated performance by reducing **VisitPad re-renders by 25%**, eliminating memory leaks, and unifying core components across modules to retire technical debt.
- Built and maintained an in-house reusable UI library with **Shadcn UI** and **Tailwind CSS**, improving frontend consistency and cross-team developer speed.
- Enhanced **VisitPad in OPD**, contributing to over **2 Crore in clinic sales** annually, and integrated **WatermelonDB** for offline-first performance in low-network, rural environments.

Data Science Intern

Aramex India Pvt Ltd

Mumbai

Aug'21 - Jan'22

- Improved last-mile delivery performance in Bahrain by refining address extraction, preprocessing, and feature engineering for delivery-point mapping.
- Developed a block and road-number mapping model that increased address precision from **90%** to **99%**, leading to a full-time role offer.

SELECTED PROJECTS

Portfolio Website

2026

- Self-built React + TypeScript portfolio with an AI chat assistant, and an automated CI pipeline that syncs this resume PDF on every update.

MangakaHue - AI Manga Colorization

2026

- Next.js + TypeScript** app colorizing manga line art with character consistency — Supabase auth, **Drizzle**/Postgres, a **pg-boss** worker queue for GPU jobs, credit-based billing, and **Vitest** test coverage.

Exploding Production Game

2026

Co-developed

- Co-developed a browser game deployed on Render with polished gameplay flow, production routing, and frontend-first interaction design.

Snapgram - Live Demo | GitHub

2024

- Full-stack social app (React, Tailwind, Appwrite) with authentication, posts, likes, comments, and real-time feed updates.

SKILLS

Frontend: ReactJS, TypeScript, JavaScript, Zustand, Shadcn, Tailwind CSS, CSS Transforms

APIs and Realtime: REST APIs, Server-Sent Events (SSE), OpenAI APIs, Firebase, real-time UI workflows

AI Tooling: Claude, AI-assisted development, LLM/chatbot integration, prompt engineering

Testing: Jest, React Testing Library (RTL), Vitest, Playwright, unit / integration / E2E testing

Engineering Tools: Git, Sentry, Amplitude, Watermelon DB, Render, Netlify

Programming Languages: JavaScript, C++, Python

EDUCATIONAL QUALIFICATIONS

B.E, Electronics and Instrumentation

7.47/10.0

Birla Institute of Technology and Science, Pilani

2022

Class 12th - ISC Board

90.33%

City Montessori School, Lucknow

2018

Class 10th - ICSE Board

95%

Seth M.R. Jaipuria School, Lucknow

2016

CERTIFICATIONS

Frontend Developer (React) – HackerRank (Verify)

GenAI for Professionals – Hack2Skill (Verify)
